What is the best diagnosis?

A. Sebaceous adenoma
B. Nevus sebaceus
C. Sebaceous carcinoma
D. Syringocystadenoma papilliferum
E. Nodular basal cell carcinoma
Nevus sebaceous
Epidermal Papillomatosis

Paucity of other Adnexal structures

Mature Sebaceous Lobules Juxtaposed To epidermis
Halo Nevus
Nevus cells

Dense Lymphocytic Infiltrate
What is the best diagnosis?

A. Pyogenic granuloma
B. Targetoid hemosiderotic hemangioma
C. Kaposi’s sarcoma
D. Dabska tumor
E. Cavernous hemangioma
Kaposi’s Sarcoma-Tumor Stage
Atypical Spindle Cells With vascular slits

Hyalinized Globules within Rare cells

Extravasated Red blood cells
Cutaneous B-cell Lymphoma
Marginal Zone Type
Grenz zone

Small lymphocytes With germinal centers

Bottom heavy infiltrate
Desmoplastic Malignant Melanoma
Patchy Chronic Inflammatory cells

Amelanotic

Minimal To absent Junctional Component

Myxoid Background

Spindle cells With minimal Pleomorphism
