Dermatopathology Slide Review Part 136

Paul K. Shitabata, M.D.
Dermatopathology Institute
Torrance, CA
What is the best diagnosis?

A. Nodular hidradenoma
B. Cutaneous Lymph Node
C. Cutaneous Lymphadenoma
D. Cutaneous Thymus Gland
E. Spiradenoma
Spiradenoma
Circumscribed dermal nodule

Basaloid cells with mature lymphocytes

Ectatic vascular spaces
What is the best diagnosis?

A. Spitz nevus
B. Halo nevus
C. Nevus of Ota
D. Blue nevus
E. Melanocytic matricoma
Halo Nevus
Symmetric proliferation of melanocytes

Variably dense lymphocytic infiltrate
Cellular Dermatofibroma

CD34 negative
Factor Xllla positive
Mild epidermal hyperplasia

Cellular spindle cells in Storiform configuration
Nodular Malignant Melanoma with Lymphovascular Invasion
Expansile asymmetric nodule of malignant melanocytes

Radial growth phase does not extend beyond
Three rete ridges from invasive vertical growth
What is the best diagnosis?

A. Melanoma in situ
B. Spitz nevus
C. Pigmented Spindle Cell Nevus
D. Extramammary Paget’s Disease
E. Langherhans cell histiocytosis
Malignant Melanoma in Situ, Superficial Spreading Type
Pleomorphic melanocytes arranged singly and nests showing extensive upward intraepithelial spread. No dermal invasion.
