

# Vascular Tumors of the Skin

Paul K. Shitabata, M.D.

Director of Dermatopathology

Harbor-UCLA Dermatology

# Key associations:

Disease	Associations
Glomeruloid hemangioma	Cobb syndrome
Masson's hemangioendothelioma	Kasabach-Merrit syndrome
Maffucci's syndrome	Organizing thrombus
Verrucous hemangioma	POEMS syndrome
Kaposiform hemangioendothelioma	Enchondromas

# Answers

Disease	Associations
Glomeruloid hemangioma	POEMS syndrome
Masson's hemangioendothelioma	Organizing thrombus
Maffucci's syndrome	Enchondromas
Verrucous hemangioma	Cobb syndrome
Kaposiform hemangioendothelioma	Kasabach-Merrit syndrome

# Characteristics of endothelial cells include:

- CD13 positivity
- CD31 positivity
- CD34 positivity
- CD43 positivity
- Weibel-Palade bodies
- Weibber-Christian bodies

# Answers

- CD31 positivity
- CD34 positivity
- Weibel-Palade bodies

# Correct associations?

Disease	Associations
Kaposi's sarcoma	Deep tumors need to be distinguished from Kimura's disease
Epithelioid hemangioma	May have rare intravascular variant
Bacillary angiomatosis	Papillary intralymphatic angioendothelioma
Pyogenic granuloma	Warthin-Starry stain positive
Dabska's tumor	Promontory sign
