What is the best diagnosis?

A. Molluscum contagiosum
B. Myrmecia
C. Orf
D. Herpes simplex virus
E. Cytomegalovirus
Molluscum contagiosum, inflamed
Notes

- In some cases of molluscum contagiosum, there is an intense inflammatory response which may obscure the characteristic viral cytopathic changes.
- The inflammation may vary from acute and chronic inflammation to granulomas.
- Multiple deeper levels may be needed to identify the characteristic viral cytopathic changes.
Viral Cytopathic changes

Increased Acute And Chronic Inflammation
