What is the best diagnosis?

A. Hailey-Hailey Disease
B. Pemphigus vulgaris
C. Pemphigus foliaceus
D. Darier’s disease
E. Pemphigus vegetans
Pemphigus foliaceus
Pearls

- Intracorneal bulla with acantholysis
- Occasional acantholytic cells cling to the undersurface of the stratum corneum “Klingons”
- Variable inflammation but usually eosinophils predominate
